

Cd'A Jr. Tackle Field Setup and Teardown Procedures

This is intended for the Home team.

(Unless both teams are from Cd'A, then **BOTH** should help!)

Setup:

1. Put one big orange cone in each corner of the end zone. (Front and Back)
2. Put yard markers on both sides of the field, 1 or 2 yards off the sideline.
3. Down marker and chains go on the home side of the field.
4. The time clock and table go on the home side of the field.
 - a. The big field uses a special wrench to undo the green box in the grass for the connections.
 - b. Both score controllers can be found in the lockers in the shed.
5. Put trash cans out, one on each side of field.
6. Put two benches for the players on each side of the field at the 50yd markers.

Teardown:

1. Put all cones and yard markers away **in order** in the shed.
2. Wrap chains and down marker neatly and put in the shed.
3. Put both benches in the shed.
4. Pick up all trash, and dump trash cans into the large dumpster, then put trash cans in the shed.

Thank you and please remember this is **YOUR** League!
